Developers' Society Core Applications '17
A *guideline*

What is Developers' Society?
Dedicated to nurturing technology, DevSoc aims to teach and inspire the youth for collaboration and unity in development. Nurturing concrete innovations, and propagating these creations to make a social impact.

A tech organization; DevSoc was founded in 2016, with its roots in De La Salle Zobel.

Purpose
DevSoc's purpose is to nurture the fundamentals and importance of technology in both a personal and communal perspective. Gathering the youth to collaborate and work together to inspire creative learning; innovation through programming, multimedia, and other facets of technology. For concrete creation, and propagation of these talents, skills, and learnings -- teaching the youth to develop and share their creations for societal betterment, as well as inspiring the world see the significance and impact of technology without limits.

Collaborate
We foster an inclusive & collaborative community of all backgrounds. / Whether experienced or beginning, into code or design, we gather passionate individuals that continuously learn from one another and grow deep bonds through various community activities and events.

Innovate
Believing in programming and code as essential skills no matter what your field of expertise lies in, we host workshops, outreaches, game jams, hackathons, and teach people of all skill levels and ages how to program.
We inspire innovation of all kinds, whether multimedia, film, writing, or game development -- and integrate it into technology.
Supporting developers within the organization, we help mixed talents create concrete products; a hub of innovation for game development, startups, projects, and more.

Propagate
It's not enough to create. Importantly, we share these creations and ensure that they are reached out to the masses. Disrupting and defying today's industries and issues with creations from the youth, we share and support developers and creatives -- ensuring that they can continue innovating with the right tools and audience. Onwards, we propagate technology and share its significance to each and every individual.

Projects

A glimpse into some of our projects for the incoming year.

Note: More to come!

Code Camp	Three-day, two-night intensive camp that immerses participants — whether beginner or advanced — on the creation process. Filled with workshops, team building, and an exciting hackathon, teams come out with new knowledge, friends, and awakened abilities.
HackSoc	DevSoc's biggest hackathon connects students from all types of backgrounds to come together and disrupt an industry/problem given on-the-spot with all kinds of creations, ranging from robotics to mobile applications to websites to tech startup services
Incubator	This indefinite project aims to nurture and provide resources and support from the ground up to marketing and funding for groups and individuals within DevSoc to conceptualize, develop, and market their startups, games, websites, applications, and more.
Convention	A gallery of the best and brightest works from DevSoc members; this convention immerses anyone into the wonders of creation and what the youth can do with it. With talks, booths, demos, showcases, screenings, panels, and more — DevSoc's biggest convention builds on the love of tech.
Connect	Connecting bright, talented kids to new opportunities — Connect brings promising members to a new level by offering a hiring and internship platform for students to kickstart their journey in the professional world; moreso ones with the ability and skill.
<youth>	An outreach series aimed from Gr 4-6 to SHS youth that teach the fundamentals of programming and robotics through one-day programs that unite and bring out talent within the youth; coming up with a whole creation by the end of the day.

Aside from tech projects, we also host fundraisers, regular workshops, and community events where we have fun and connect.

Developers' Society Core

The core team are members of Developers' Society that take part in the formation and development of its events, programs, and foothold as a technology organization.

Working underneath the officers and executive committee, they help in ensuring the success of DevSoc's events, working within their strengths.

Core members act as liaisons in program formation, working with what they're best at. From this status, they may be elevated to an official officer upon expression of interest and display of skills.

- Assist in the development of programs
  - Act as event staff; based on your skillset & volunteerism
  - Pioneer new events and activities
- Participate and share!

- Learn with us, share and promote DevSoc's opportunities and join our collaborative community
- Innovate with us
  - Closely support and be a part of the organization's incubation and hiring programs; whether your skill is leadership, communication, marketing, coding, or design

If you aren't currently a Developers' Society Member
- You also gain entrance to the organization and have member benefits. There is no need to apply again during the membership cycle.

If you are currently a Developers' Society Member
- Your position is elevated to core.

If you're interested in also becoming an officer, this is the best way to get started. The core member application also inquires on your desired positions, if ever!
If not, that's fine and you can continue to assist as a general core member!

In case it's confusing: officers are also core members, but have specific designated tasks that extend from what regular core can do.

Programs & Events	Plans the events and programs for the organization; directs suggestions and other committees for event needs.
Human Resources	Oversees membership recruitment & maintains communication. Works with above in handling outreaches and immersion projects.
External Affairs	Communicates and manages relationships with DevSoc's external stakeholders including other organizations, companies and schools.
Finance & Logistics	Oversees finances and fundraising strategies as well as keeping track of program requirements and handling of the materials and inventory.
Media & Publicity	Handles event documentation and online publicity, including DevSoc's social media. Members must be knowledgeable in multimedia skills and be flexible in terms of communication.
Secretariat and Publication	Handles the official documents of the organization along with writing content for publication. Works underneath the secretary.

Application Procedure

Eligibility

- Must currently be a student.
  - From SHS (Gr9 onwards) to college, all are welcome!
- Reside around the Metro Manila area.

- - Our events are based around here, but we're looking forward to expanding in the future! For now though, we need a core team that can come to events.
  - Be passionate about technology.
    - Whether you're taking up compsci and have been making games since you were eight, or aren't too into coding or graphic design but are fascinated with learning more and more about tech -- as long as you have a heart to learn and serve, go for it! This is an opportunity to learn as well -- not just one for experienced students.

That's all!

ADDITIONALLY: Although not required, you may opt to send a CV or Resume to devsocietyph+coreapps@gmail.com after completing the form.

If you want to be a part of one of the most passionate, student-run technology organizations, it's time to step up and join. Whether you're learning yourself or are experienced, we welcome all individuals that love technology to help us in our mission.

Gateway
Application process (form & optional CV) → screening & online interviews → deliberation (core acceptance and officer elevation) → results
